AUGUST, 2025

FINAL SIA Report

Social Impact Assessment Report for "Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)"

Prepared For:

Nabakrushna Choudhury Centre for Development Studies (NCDS)

Prepared By:

Social Action For Rural Development

August, 2025

INFORMATION ABOUT THE AGENCY

Brief Organization Profile

This Social Impact Assessment (SIA) report has been prepared by Social Action for Rural Development (SARDA).

Social Action for Rural Development (SARDA), having its registered office at Ramgarh, Jharkhand, is working on development issues since its inception in year 2003 and holds expertise in conducting Social Impact Assessments, Environmental Impact Assessments, Forest Development Agencies (FDA) Evaluation, Preparation of Detailed DPR, Micro Plan for Joint Forest Management Areas, PRA exercise, Baseline Survey and Research & Planning Services. Currently SARDA is working in 8 states of India (Jharkhand, Odisha, Bihar, Madhya Pradesh, Chhattisgarh, Jammu & Kashmir, Uttar Pradesh and Maharashtra).

Addresses of SARDA offices across India are as below:

Jharkhand (Head Office): *SARDA Bhawan, Chhotaki Murram, Ramgarh Cantt., Dist-Ramgarh, Pin-829122* ***Mobile No. -9431146129, 9431146893***	***Bihar:*** *Near Supriya's Ram Raj Villa Apartment, National seed Co-operation Road, Shashtri Nagar Market,* *Shekhpura, Patna -14, Bihar*
Madhya Pradesh *SARDA AGRO TOURISM CENTRE (SATC) Gram Harranala, Block – Baihar, District-Balaghat, Madhya Pradesh, Pin- 481105* ***Telephone No.: 07182-251033, Mobile no.: 9404152076***	***Maharashtra:*** ***C/O RURAL DEVELOPMENT RESOURCE CENTRE (RDRC),*** *Vill-Wajbori, Katol Road, Block-Katol, District-Nagpur, Landmark-Hirantal Farm, Pincode- 441302, Maharashtra* ***Mobile no.: 09423193460***

FINAL SIA REPORT

Social Impact Assessment Report of Land Acquisition for "**Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)**" at Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahasil of Dhenkanal District.

For on behalf of SARDA Organization:

Approved by *Dr. N.P. Singh*

Signed by

Position Held *Managing Director*

Date

This SIA report has been undertaken in compliance with the approved GUIDELINES of ***Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation & Resettlement Act, 2013.*** *Information and content provided in the report is factually correct for the purpose and objective for such study undertaken.*

EXECUTIVE SUMMARY

Project Background

M/s Rungta Mines Limited (RML) is a flagship company of S.R.Rungta Group. It was incorporated in 1962 with headquarters at Chaibasa in the state of Jharkand. The company was set up with the objective of supporting India's growing steel industry as well as for boosting foreign exchange earnings. The company is registered with the Ministry of Commerce, Government of India as Category I Exporter of Iron Ore, Manganese ore and other minerals. M/s RML has decided to go for forward integration by manufacturing of Steel. In this respect, the company has executed an MOU with the Government of Orissa. M/s RML has identified the site for Steel plant adjacent to Railway track between Meramandali station and Nayabhagirathipur Paschimabad PH on DN line side. The capacity of Steel plant is 1.45 MTPA in Phase-I and 2.85 MTPA after Phase-II. Initially, Detailed Project Report (DPR) for establishing the Private Railway Siding taking off from Nayabhagirathipur Paschimabad PH for handling the Phase-I traffic was submitted to Railways by M/s Aarvee Associates and the conditional approval of the DPR was accorded by Railways on 01.01.2021 vide letter No.COM/Plg./BBS/Rungta Mines/NBT/224/Pt-I dated 01.01.2021.

In the Phase-I DPR, the siding was planned to be commissioned in two (02) stages i.e., Phase- I Stage-I and Phase-I Stage-II by constructing the siding yards on either side of the Hindol Road – Meramandali railway line.

Project Objective

The main objective of the study is to prepare detailed layout plans of the rail network, operational plan and system of working, signaling and interlocking plan etc. for the creation of rail infrastructure to handle expanded traffic in the yard area and suggest appropriate rail connectivity between the various points to ensure smooth and efficient flow of traffic to and from the yard.

Land Requirement Details

Proposed alignment runs through Government land, private land, forest land etc.
Necessary arrangement will be made by RML to acquire the required land for development of Rail corridor. Entire land has been proposed to be acquired for Double line. The land required is as follows:

Table: Land Requirement Details

S.No.	Type of Land	Area (in Ac.)
1	PVT	103.685
2	GOVT.	35.913
3	Forest	1.557
4	Railway Land	24.654
Total		**165.809**

Note: *The process of land acquisition except Railway land is under progress and it is being acquired through Industrial Development Corporation (IDCO), Govt. of Odisha.*

Approx 96.2210 acres of private land are to be acquired for establishment of Industries for External Rail connectivity to Plant. It has been proposed to acquire land for this establishment of industries from 8 villages of Odapada & Hindol Block of Dhenkanal District.

Table No. – Land details of Affected Villages

S. No.	Name of the Village	Area to be acquired (In ac.)	No. Of Affected Plots
1	Jhadabandha	7.7600	26
2	Haladia Bahal	41.2250	223
3	Kalusau Kateni	3.9000	45
4	Meramandali	3.4560	23
5	Nayabhagirathipur Paschimabad	1.6400	10
6	Nimidha	14.6400	89
7	Salapada	2.2000	33
8	Uparapal	21.4000	126
	Total	96.2210	575

This SIA report presents the social impact assessment related to PAFs from the "**Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)**" at Jhadabandha , Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District.

Rationale for Project and Public Purpose

In consultation with the respective representatives of the state government, potential areas for the establishment of industries with external rail connectivity to the plant have been identified. These proposals are based on key factors such as land availability, access to raw materials, proximity to ports, and favourable government policies. The infrastructure to be developed as part of the Dhenkanal project is poised to significantly enhance logistics efficiency and catalyze overall regional development. The project directly addresses the need for economic growth, industrial diversification, and employment creation. It is expected to generate a substantial number of direct jobs for skilled and unskilled workers during construction and operational phases. In addition, indirect employment opportunities will emerge through the growth of ancillary and downstream industries such as fabrication, transport, logistics, trading, small businesses, and service providers. This will help reduce rural underemployment and encourage migration reversal, as local youth will have better livelihood options closer to home.

Beyond economic gains, the project will also support community development initiatives through corporate social responsibility (CSR) activities. These are likely to include investments in education, health care, sanitation, drinking water, and livelihood enhancement programs, thereby directly improving the quality of life in nearby villages. Furthermore, skill development and vocational training initiatives will prepare local youth for long-term employability, ensuring that the benefits of the project are shared inclusively.

Scope of the Study

As per the provisions of Clause 4(1) of the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013, the State Government is mandated to establish an independent body—referred to as the State Social Impact Assessment (SIA) Unit. This unit is responsible for overseeing and facilitating the SIA process through qualified individuals or institutions, excluding the project proponent or requiring body.

The core responsibilities of the SIA Unit include developing a robust database of certified SIA resource partners and practitioners across the state. These partners form a network of individuals and institutions capable of undertaking credible and objective SIA studies for land acquisition, rehabilitation, and resettlement processes.

For this particular study, the Social Action for Rural Development (SARDA) has been designated to carry out the SIA for the proposed project related to External Rail Connectivity to the Plant. The study is being conducted in accordance with the Terms of Reference provided by the SIA Unit of the Government of Odisha and in line with the Land Acquisition Act, 2013. The scope of this assessment includes the following key components:

- Project Overview and Entitlement Estimation: Detailed description of the proposed project and assessment of entitlements for families likely to be affected.
- Socio-economic and Cultural Profiling: Comprehensive study of the demographic, social, economic, and cultural context of the affected communities.
- Stakeholder Consultations: Engagement with local stakeholders through public meetings, structured interviews, and survey questionnaires to gather insights and concerns.
- Assessment of Potential Social Impacts: Identification and analysis of any adverse social consequences resulting from the establishment of industrial infrastructure for external rail connectivity.
- Preparation of a Social Impact Management Plan (SIMP): Development of a detailed mitigation and management plan to address potential risks and ensure equitable and inclusive outcomes for affected communities.

Objectives

The Social Impact Assessment aims to evaluate the potential consequences of land acquisition for a proposed project, with a specific focus on the communities and resources that may be affected. The key objectives include:

- Estimating the number of families likely to be impacted, the extent of land and property loss based on current holdings, and identifying those who may face physical displacement or livelihood disruptions.
- Assessing the scope of land—both public and private—that may be affected, including houses, community infrastructure, and other shared assets.
- Evaluating whether the land identified for acquisition is the absolute minimum required for the project, and exploring the feasibility of alternative sites that may reduce displacement and disruption.

- Determining whether the proposed land lies within a Scheduled Area, thereby requiring adherence to specific legal and procedural safeguards.
- Reviewing if any parcels of land have already been purchased, leased, alienated, or acquired, along with the intended usage of each.
- Exploring the availability of unutilized public land and verifying if any such land is currently under occupation or informal use.
- Analyzing landholding patterns, ownership structures, the distribution of land, residential settlements, and the presence of both public and private infrastructure.
- Examining recent land price trends, ownership transfers, and changes in land use over the past three years to understand market dynamics and community-level developments.
- Assessing the overall impact on the affected villages, including social, economic, cultural, and environmental dimensions, with special attention to issues such as food security and access to resources.
- Identifying the implications for both directly affected households (such as landowners) and indirectly affected groups who may lose access to common property resources or socio-economic services.
- Weighing the social and economic costs of displacement and disruption against the projected benefits of the project.
- Recommending mitigation strategies and policy interventions through the formulation of a comprehensive Social Impact Management Plan, aimed at minimizing adverse effects and promoting sustainable rehabilitation and resettlement.

Research Methodology and Tools

The study integrated both quantitative and qualitative research methods to gather comprehensive data. This involved conducting household surveys, performing detailed field visits, and organizing Focus Group Discussions (FGDs) to gain in-depth insights. Participatory approaches, including social mapping and Participatory Rural Appraisal (PRA) techniques, were utilized to ensure the active involvement of community members in the data collection process. Key Informant Interviews (KIIs) were also conducted with selected individuals to gather expert knowledge and contextual information. A structured interview schedule was distributed to the relevant stakeholders, and the survey was further extended through door-to-door interviews at the household level. These methods collectively helped ensure a holistic understanding of the research subject from multiple perspectives.

Desk Review

As part of the study process, a comprehensive review was conducted of both published and unpublished reports, development plans, and maps. This also included an examination of the Resettlement and Rehabilitation (R&R) policies under both the central and state Acts, including the **RFCTLARR Act, 2013**, and the **Odisha Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement (ORFCTLAR&R) Rules, 2016**. In addition, related research publications were also analyzed to gain a deeper understanding of the applicable legal frameworks and best practices in land acquisition and resettlement.

Personal interview with affected and non-affected HHs

Pre-tested schedules and questionnaires were developed for conducting the household (HH) survey, which covered all affected households and a sample of non-affected households. The objective was to gather information on the socio-economic conditions of the families, including income and expenditure,

land holding patterns, details about the land to be acquired, asset ownership, and access to basic infrastructure and institutional facilities. Additionally, the survey explored their expectations (land or cash compensation) and the anticipated social and economic benefits or consequences of the project. Field testing was conducted before finalizing the questionnaires. Most of the questions were pre-coded, except those that sought the opinions and views of the affected individuals, which were left open-ended. Prior to administering the questionnaires, affected families were asked to provide necessary documents, such as ration cards, land records (RoR), and voter cards, to verify their residence and ownership of the affected properties.

Sample Design

To ensure a comprehensive analysis, all affected households were surveyed. Additionally, for a comparative impact assessment, 156 non-affected households from the same village were included as a control group. In total, 1106 households were surveyed, which consisted of 950 affected households and 156 non-affected households (control group). This approach allowed for a thorough understanding of the project's impact on both the directly affected and unaffected populations.

Description and Rationale for Methodology

Social Impact Assessment (SIA) is a systematic process used to assess the social consequences of infrastructure projects and other development activities. The SIA for this project involved a combination of methods, including socio-economic surveys, Participatory Rural Appraisal (PRA), and Focus Group Discussions (FGDs) with project-affected families (PAFs). This approach helps identify and evaluate the social and economic impacts on communities that may experience displacement or other disruptions due to the project. SIA not only analyzes and monitors the intended and unintended social impacts—both positive and negative—of the planned interventions but also tracks the social changes triggered by these projects. The data collected through these processes informs the design of mitigation strategies and provides a basis for monitoring the effectiveness of these measures over time. To ensure comprehensive and accurate data, various primary and secondary data sources were consulted, offering a well-rounded understanding of the potential social impacts of the proposed project.

SIA and SIMP Plan Preparation Process

A Social Impact Assessment (SIA) and a corresponding Social Impact Management Plan (SIMP) are essential when a project leads to either physical or economic displacement of communities. These tools are critical in ensuring that the affected individuals and families have their livelihoods restored to at least the same level as before the project commenced. An effective SIA and SIMP should be built on a thorough understanding of the project’s socio-economic implications. Key steps include identifying potential social and economic impacts, engaging with local communities through consultations, reviewing the legal provisions related to land acquisition and compensation, defining an entitlement framework, and outlining strategies for relocation, resettlement, and livelihood restoration. The plan should also include a detailed budget for implementing Resettlement and Rehabilitation (R&R) measures, ensuring a transparent and equitable transition for affected populations.

Aim of the Study

The aim of the study is to conduct a Social Impact Assessment study in accordance to approved GUIDELINES of **Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation & Resettlement Rules, 2013**(RFCTLARR)

Approach & Methodology

The Social Impact Assessment (SIA) has been conducted in accordance with the RFCTLARR Rules 2013. The methodology for the SIA study is based on the following key components:

- Group discussions with villagers to assess the overall impact of the project on the village's socio-economic and environmental conditions, utilizing Participatory Rural Appraisal (PRA) tools such as Village Surveys and Social-Resource Mapping.
- A comprehensive evaluation of the socio-economic status of individuals who may face negative impacts, carried out through Focus Group Discussions (FGDs) and surveys.
- Engagement with Project-Affected Families (PAFs) to understand their concerns and needs.
- Focus Group Discussions (FGDs) and interactions with both Land-Loser and Non-Land-Loser Families to assess the direct and indirect impacts on all affected households.

This approach ensures a thorough and inclusive understanding of the social impacts of the project on the community.

Site Visit and Information Dissemination

The SIA team conducted site visits to verify the project map and identify the affected areas. Once the area was identified, the survey team consulted with the local Mukhiya (PRI) and other resource persons at the project site. They also organized Focus Group Discussions (FGDs) with the villagers to gather their perspectives and concerns about the Land Acquisition process. Additionally, meetings were held with the stakeholders who would be affected, ensuring they were well-informed about the project and the survey procedures.

Baseline Socio- Economic Profile

Following the enumeration and verification of potentially affected plots in the project area, efforts were made to conduct a comprehensive Village Socio-Economic Survey and household-level assessments to understand the impact of the proposed project on the socio-economic conditions of affected families. The surveys were carried out using pre-tested formats for the "Village Survey" and a "Household Questionnaire." These questionnaires focused on gathering information such as identification details of Project-Affected Families (PAFs), their social profiles, family details, occupations, sources of income, family expenditures, documents proving ownership, and details of affected structures. The survey also collected data on commercial/self-employment activities, employment patterns, land types, land use, and the opinions and views of PAFs regarding the project, resettlement, and rehabilitation. Both open-ended and close-ended questions were included in the questionnaire to capture a comprehensive range of responses.

Limitations of the Study

- Some household members were unavailable during the survey, and unwilling to participate in primary data collection.
- Some individuals were hesitant to share sensitive information regarding their income, land ownership, or living conditions due to fear of legal, financial, or social consequences.

Nature of Ownership

The study examined the nature of land ownership among the affected households. The following table illustrates the number of titleholders and other landholders who possess land through inheritance rights.

Types of land Ownership as per the land rights

S.No.	Type of Land Ownership	Area in Acres	Remarks
1	Legal land Owners	96.2210	950 HH from 537 plots covered out of total 575 private plots
2	Few Encroachments under the project area	00	--

No. of Title Holders and Legal Heirs

Villages	No. Of Title Holder (as per land records)	No. Of Land Holders (Inheritance rights)
All 08 Villages Combined **(Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal)**	**267**	**950**

Source: Field Survey

Table No: Details of HH Coverage of Legal Owners

S. No	Name of the Villages	Total No. Of Plots	Area to be Acquired (in Ac.)	No. Of Household Covered	No. Of Plots to be covered	No. Of plots covered in the HH Survey
1	Jhadabandha	26	7.7600	63	02	24

Source: Field Survey

Key Findings

Socio-economic & Cultural Profile-

I. Total of 1106 surveyed households (HHs), 950 HHs are affected families and 156 Non-affected families.

II. A total of 3,250 project affected persons will be impacted, comprising 1,783 males and 1,467 females, belonging to the 950 project-affected families.

III. Marital status analysis shows that among the affected individuals, 1,061 (32.65%) are unmarried, 1,944 (59.81%) are married, 210 (6.46%) are widowed, and 2 (0.06%) are divorced.

IV. It was found that none of the 950 project-affected families fall under the vulnerable category.

V. The educational profile of the affected individuals is as follows: 55 individuals have completed Pre-Primary education, 603 individuals have completed Primary education, 730 individuals have attained Secondary education, 208 individuals have completed Higher Secondary education, 321 individuals hold a Graduate degree, 22 individuals have completed Postgraduate studies, 19 individuals possess a Diploma, 3 individuals hold a Ph.D., 16 individuals have completed ITI training, and 9 individuals have degrees in other professional courses. Educational data for 1,212 individuals was not available.

VI. Primary and subsidiary sources of livelihood among the affected families reveal: 12.58% are employed in various private sectors, 7.23% depend on farming and cultivation, 2.55% are employed in government jobs, 17.72% are engaged in business activities, 0.67% are retired individuals, and 58.30% are categorized as unemployed (including children, homemakers, senior citizens and other unemployed individuals). Additionally, for 0.70% of individuals, livelihood data was unavailable.

Table No. Summary of estimation and enumeration of Project Affected Families Village-wise

S. No.	Parameters	Numbers	Surveyed	Haladia Bahal	Jhadabandha	Kalusau Kateni	Meramandali	Nimidha	Nayabhagirathipur Paschimabad	Salapada	Uparapal	Total

8	No. Of Project affected PERSONS(PAPs)	3250	3250	1133	281	466	137	598	20	149	466	3250
9	No. Of Male(PAPs)			611	167	263	76	325	13	80	248	1783
10	No. Of Female(PAPs)			522	114	203	61	273	7	69	218	1467

Overall impact:

The anticipated impact of the project can be summarized as follows:

- According to the affected families, the project is expected to have a positive impact on local development, contributing to economic growth and infrastructure improvements.
- The project will result in the loss of no residential houses, as 00 residential structures were identified in the affected area. However, affected families/persons may still experience disruptions, necessitating appropriate rehabilitation and resettlement (R&R) measures.
- Community discussions revealed concerns that the proposed project may adversely impact sustainable livelihoods, as it involves the loss of agricultural land on which many villagers are heavily dependent. Additionally, residents expressed apprehensions regarding potential health risks associated with mining activities, including air and water pollution, which may further exacerbate their vulnerability.
- The local population expects the project to generate new employment opportunities, enhancing job prospects both during and after construction.

The proposed expansion of the integrated steel plant to 2.85 MTPA at Jharbandh, Dhenkanal by M/s Rungta Mines Limited is planned within the existing project area where 90% of land is already under the company's possession. The current site has been finalized considering advantages such as proximity to water (Brahmani river -10 km), availability of captive power, railway connectivity (Meramandali station 8 km), road access via NH-42, and closeness to Bhubaneswar airport (120 km). Alternative sites were examined but found unfeasible due to operational, technical, and environmental constraints.

The land proposed represents the bare minimum requirement for plant expansion; any reduction would compromise safety, layout, and efficiency. A railway corridor to support the project has also been planned with minimal impact on households, and no physical displacement of families is anticipated. However, economic displacement due to loss of agricultural land is expected.

A cost-benefit analysis indicates that while social costs involve land acquisition, environmental impacts, and temporary disturbances during construction, the benefits far outweigh costs. These include large-scale direct and indirect employment generation, boost to the local economy, improved infrastructure, CSR-driven social welfare (education, healthcare, sanitation), and significant contribution to state and national revenue. At the national level, the project will enhance steel production capacity, reduce import dependency, and contribute to the vision of Atmanirbhar Bharat.

An entitlement matrix in line with the RFCTLARR Act, 2013 ensures adequate compensation, annuities, livelihood support, and rehabilitation benefits to affected families, along with specific provisions for SC/ST households. The project requires acquisition of private agricultural land and limited government land, along with minor impact on community resources such as roads, pathways, and grazing areas. Measures will be taken to safeguard, restore, or compensate affected CPRs.

Overall, the project is expected to generate substantial economic, social, regional, and national benefits while ensuring statutory compliance and sustainable development of the Dhenkanal region.

CHAPTER-I

Detailed Project Description

1.1 Project Background

M/s Rungta Mines Limited (RML) is a flagship company of S.R.Rungta Group. It was incorporated in 1962 with headquarters at Chaibasa in the state of Jharkhand. The company was set up with the objective of supporting India's growing steel industry as well as for boosting foreign exchange earnings. The company is registered with the Ministry of Commerce, Government of India as Category I Exporter of Iron Ore, Manganese ore and other minerals. M/s RML has decided to go for forward integration by manufacturing of Steel. In this respect, the company has executed an MOU with the Government of Orissa. M/s RML has identified the site for Steel plant adjacent to Railway track between Meramandali station and Nayabhagirathipur Paschimabad PH on DN line side. The capacity of Steel plant is 1.45 MTPA in Phase-I and 2.85 MTPA after Phase-II. Initially, Detailed Project Report (DPR) for establishing the Private Railway Siding taking off from Nayabhagirathipur Paschimabad PH for handling the Phase-I traffic was submitted to Railways by M/s Aarvee Associates and the conditional approval of the DPR was accorded by Railways on 01.01.2021 vide letter No.COM/Plg./BBS/Rungta Mines/NBT/224/Pt-I dated 01.01.2021. In the Phase-I DPR, the siding was planned to be commissioned in two (02) stages i.e., Phase- I Stage-I and Phase-I Stage-II by constructing the siding yards on either side of the Hindol Road – Meramandali railway line.

Project Objective

The main objective of the project is to prepare detailed layout plans of the rail network, operational plan and system of working, signaling and interlocking plan etc. for the creation of rail infrastructure to handle expanded traffic in the yard area and suggest appropriate rail connectivity between the various points to ensure smooth and efficient flow of traffic to and from the yard.

Land Requirement Details

Proposed alignment runs through Government land, private land, forest land etc.
Necessary arrangement will be made by RML to acquire the required land for development of Rail corridor. Entire land has been proposed to be acquired for Double line. The land required is as follows:

Table: 01: Land Requirement Details

S.No.	Type of Land	Area (in Ac.)
1	PVT	103.685
2	GOVT.	35.913
3	Forest	1.557
4	Railway Land	24.654
Total		**165.809**

Note: *The process of land acquisition except Railway land is under progress and it is being acquired through Industrial Development Corporation (IDCO), Govt. of Odisha.*

Approx 96.2210 acres of private land are to be acquired for establishment of Industries for External Rail connectivity to Plant. It has been proposed to acquire land for this establishment of industries from 8 villages of Odapada & Hindol Block of Dhenkanal District.

Table No. 02 – Land details of Affected Villages

S. No.	Name of the Village	Area to be acquired (In ac.)	No. Of Affected Plots
1	Jhadabandha	7.7600	26
2	Haladia Bahal	41.2250	223
3	Kalusau Kateni	3.9000	45
4	Meramandali	3.4560	23
5	Nayabhagirathipur Paschimabad	1.6400	10
6	Nimidha	14.6400	89
7	Salapada	2.2000	33
8	Uparapal	21.4000	126
Total		96.2210	575

This SIA report presents the social impact assessment related to PAFs from the "**Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)**" at Jhadabandha , Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District.

1.2 Rationale for Project and Public Purpose

In consultation with the respective representatives of the state government, potential areas for the In consultation with the respective representatives of the state government, potential areas for the establishment of industries with external rail connectivity to the plant have been identified. These proposals are based on key factors such as land availability, access to raw materials, proximity to ports, and favourable government policies. The infrastructure to be developed as part of the Dhenkanal project is poised to significantly enhance logistics efficiency and catalyze overall regional development. The project directly addresses the need for economic growth, industrial diversification, and employment creation. It is expected to generate a substantial number of direct jobs for skilled and unskilled workers during construction and operational phases. In addition, indirect employment opportunities will emerge through the growth of ancillary and downstream industries such as fabrication, transport, logistics, trading, small businesses, and service providers. This will help reduce rural underemployment and encourage migration reversal, as local youth will have better livelihood options closer to home.

Beyond economic gains, the project will also support community development initiatives through corporate social responsibility (CSR) activities. These are likely to include investments in education, health care, sanitation, drinking water, and livelihood enhancement programs, thereby directly improving the quality of life in nearby villages. Furthermore, skill development and vocational training initiatives will prepare local youth for long-term employability, ensuring that the benefits of the project are shared inclusively.

1.3 Applicable Legislation and Policies

This section outlines the existing laws and regulations that apply to the proposed acquisition for the "**Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)**" at Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District. A thorough analysis of relevant Acts and policies is essential to comprehend the legal frameworks and procedural requirements for implementing the project. Additionally, this analysis helps in identifying any potential gaps or areas where further compliance may be necessary. The applicable laws concerning land acquisition, rehabilitation, and resettlement are critical to ensure the project meets all legal and ethical standards.

1.4 Rehabilitation and Resettlement Policy- A Legal Framework

The legislative framework is designed to safeguard and enhance the socio-economic well-being of households affected by the project. Existing laws and policies establish a foundation for the development and execution of a resettlement and rehabilitation plan aimed at ensuring sustainable outcomes in areas such as income, health, education, water, sanitation, and livelihood opportunities for the impacted communities. This chapter focuses on the relevant national and state legislation and policies, along with the institutions responsible for implementing or regulating land acquisition, resettlement, and environmental considerations. These frameworks are crucial for the successful and equitable execution of the project.

1.5 Odisha Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement (ORFCTLAR&R) Rules 2016

The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 (RFCTLARR) is an Act of Indian Parliament that regulates land acquisition and lays down the procedure and rules for granting compensation, rehabilitation and resettlement to the affected persons in India. The Act has provisions to provide fair compensation to those whose land is taken away, brings transparency to the process of acquisition of land to set up factories or buildings, infrastructural projects and assure rehabilitation of those affected.

The Odisha Land Acquisition, Rehabilitation, and Resettlement (LARR) Rules, 2016 provide a detailed framework for the effective implementation of the Odisha LARR Act, 2016. These rules ensure fair compensation for land acquisition, including compensation for land, structures, crops, and trees. They emphasize resettlement and rehabilitation measures, guaranteeing that displaced families are provided with alternative land or housing, along with access to basic services like water, sanitation, and electricity. A key requirement is the Social Impact Assessment (SIA), which involves consultations with local communities, particularly vulnerable groups such as Scheduled Tribes (STs) and Scheduled Castes (SCs). The rules also prioritize the protection of these vulnerable groups' rights, while ensuring that displaced persons receive employment opportunities, skill development, and livelihood support. Furthermore, the rules establish an institutional framework for monitoring and overseeing the process at both district and state levels, along with a grievance redressal mechanism to address any concerns. Additionally, provisions for annuity schemes ensure long-term financial security for those affected, along with support for adapting to new livelihoods. Overall, the Odisha LARR Rules, 2016 aim to protect the socio-economic well-being of affected individuals, ensuring the fair, transparent, and efficient implementation of land acquisition, resettlement, and rehabilitation processes.

As per Odisha Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement (ORFCTLAR&R) Act 2013 (Rule-2016), SIA study has to be conducted by an agency selected by state nodal agency prior to land acquisition. Social Action for Rural Development has been selected to undertake SIA study for the land acquisition for **"Establishment of Industries for External Rail Connectivity to Plants (TOR 63-00001)**" at Jhadabandha , Haladia Bahal, Kalusau

Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District.

CHAPTER-II
Study, Objectives, Team Composition, Approach, Methodology and Schedule of the SIA

2.1 Scope of the Study

As per the provisions of Clause 4(1) of the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013, the State Government is mandated to establish an independent body—referred to as the State Social Impact Assessment (SIA) Unit. This unit is responsible for overseeing and facilitating the SIA process through qualified individuals or institutions, excluding the project proponent or requiring body.

The core responsibilities of the SIA Unit include developing a robust database of certified SIA resource partners and practitioners across the state. These partners form a network of individuals and institutions capable of undertaking credible and objective SIA studies for land acquisition, rehabilitation, and resettlement processes.

For this particular study, the Social Action for Rural Development (SARDA) has been designated to carry out the SIA for the proposed project related to External Rail Connectivity to the Plant. The study is being conducted in accordance with the Terms of Reference provided by the SIA Unit of the Government of Odisha and in line with the Land Acquisition Act, 2013. The scope of this assessment includes the following key components:

- Project Overview and Entitlement Estimation: Detailed description of the proposed project and assessment of entitlements for families likely to be affected.
- Socio-economic and Cultural Profiling: Comprehensive study of the demographic, social, economic, and cultural context of the affected communities.
- Stakeholder Consultations: Engagement with local stakeholders through public meetings, structured interviews, and survey questionnaires to gather insights and concerns.
- Assessment of Potential Social Impacts: Identification and analysis of any adverse social consequences resulting from the establishment of industrial infrastructure for external rail connectivity.
- Preparation of a Social Impact Management Plan (SIMP): Development of a detailed mitigation and management plan to address potential risks and ensure equitable and inclusive outcomes for affected communities.

2.2 Objectives

The Social Impact Assessment aims to evaluate the potential consequences of land acquisition for a proposed project, with a specific focus on the communities and resources that may be affected. The key objectives include:

- Estimating the number of families likely to be impacted, the extent of land and property loss based on current holdings, and identifying those who may face physical displacement or livelihood disruptions.

- Assessing the scope of land—both public and private—that may be affected, including houses, community infrastructure, and other shared assets.
- Evaluating whether the land identified for acquisition is the absolute minimum required for the project, and exploring the feasibility of alternative sites that may reduce displacement and disruption.
- Determining whether the proposed land lies within a Scheduled Area, thereby requiring adherence to specific legal and procedural safeguards.
- Reviewing if any parcels of land have already been purchased, leased, alienated, or acquired, along with the intended usage of each.
- Exploring the availability of unutilized public land and verifying if any such land is currently under occupation or informal use.
- Analyzing landholding patterns, ownership structures, the distribution of land, residential settlements, and the presence of both public and private infrastructure.
- Examining recent land price trends, ownership transfers, and changes in land use over the past three years to understand market dynamics and community-level developments.
- Assessing the overall impact on the affected villages, including social, economic, cultural, and environmental dimensions, with special attention to issues such as food security and access to resources.
- Identifying the implications for both directly affected households (such as landowners) and indirectly affected groups who may lose access to common property resources or socio-economic services.
- Weighing the social and economic costs of displacement and disruption against the projected benefits of the project.
- Recommending mitigation strategies and policy interventions through the formulation of a comprehensive Social Impact Management Plan, aimed at minimizing adverse effects and promoting sustainable rehabilitation and resettlement.

2.3 Research Methodology and Tools

The study integrated both quantitative and qualitative research methods to gather comprehensive data. This involved conducting household surveys, performing detailed field visits, and organizing Focus Group Discussions (FGDs) to gain in-depth insights. Participatory approaches, including social mapping and Participatory Rural Appraisal (PRA) techniques, were utilized to ensure the active involvement of community members in the data collection process. Key Informant Interviews (KIIs) were also conducted with selected individuals to gather expert knowledge and contextual information. A structured interview schedule was distributed to the relevant stakeholders, and the survey was further extended through door-to-door interviews at the household level. These methods collectively helped ensure a holistic understanding of the research subject from multiple perspectives.

2.3.1 Desk Review

As part of the study process, a comprehensive review was conducted of both published and unpublished reports, development plans, and maps. This also included an examination of the Resettlement and Rehabilitation (R&R) policies under both the central and state Acts, including the **RFCTLARR Act, 2013**, and the **Odisha Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement (ORFCTLAR&R) Rules, 2016**. In addition, related research

publications were also analyzed to gain a deeper understanding of the applicable legal frameworks and best practices in land acquisition and resettlement.

2.3.2 Personal interview with affected and non-affected HHs

Pre-tested schedules and questionnaires were developed for conducting the household (HH) survey, which covered all affected households and a sample of non-affected households. The objective was to gather information on the socio-economic conditions of the families, including income and expenditure, land holding patterns, details about the land to be acquired, asset ownership, and access to basic infrastructure and institutional facilities. Additionally, the survey explored their expectations (land or cash compensation) and the anticipated social and economic benefits or consequences of the project. Field testing was conducted before finalizing the questionnaires. Most of the questions were pre-coded, except those that sought the opinions and views of the affected individuals, which were left open-ended. Prior to administering the questionnaires, affected families were asked to provide necessary documents, such as ration cards, land records (RoR), and voter cards, to verify their residence and ownership of the affected properties.

2.4 Team Composition

The composition of the Social Impact Assessment (SIA) team is outlined in Table 00, with each member assigned specific responsibilities for conducting the assessment. The team is comprised of professionals with extensive experience in their respective fields, each having successfully conducted several similar studies in the past. Their collective expertise ensures a thorough and well-informed approach to the Social Impact Assessment process.

Table No: 03 Expert Team Members

S. No.	Professionals	Name of the Staff	Qualification
1	Team Leader	Mr. Shishir Kumar	PGDRD
2	Field Investigator	Mr. Jayadev Dalai	MSW
3	Field Investigator	Mr. Bijay Kumar Parida	BA
4	Data Interpretation & Analyst	Miss. Mandira Singh Roy	MSW
5	Computer Operator	Mr. Subhashree Behera	B.Sc

2.5 Description and Rationale for Methodology

Social Impact Assessment (SIA) is a systematic process used to assess the social consequences of infrastructure projects and other development activities. The SIA for this project involved a combination of methods, including socio-economic surveys, Participatory Rural Appraisal (PRA), and Focus Group Discussions (FGDs) with project-affected families (PAFs). This approach helps identify and evaluate the social and economic impacts on communities that may experience displacement or other disruptions due to the project. SIA not only analyzes and monitors the intended and unintended social impacts—both positive and negative—of the planned interventions but also tracks the social changes triggered by these projects. The data collected through these processes informs the design of mitigation strategies and

provides a basis for monitoring the effectiveness of these measures over time. To ensure comprehensive and accurate data, various primary and secondary data sources were consulted, offering a well-rounded understanding of the potential social impacts of the proposed project.

2.6 SIA and SIMP Plan Preparation Process

A Social Impact Assessment (SIA) and a corresponding Social Impact Management Plan (SIMP) are essential when a project leads to either physical or economic displacement of communities. These tools are critical in ensuring that the affected individuals and families have their livelihoods restored to at least the same level as before the project commenced. An effective SIA and SIMP should be built on a thorough understanding of the project's socio-economic implications. Key steps include identifying potential social and economic impacts, engaging with local communities through consultations, reviewing the legal provisions related to land acquisition and compensation, defining an entitlement framework, and outlining strategies for relocation, resettlement, and livelihood restoration. The plan should also include a detailed budget for implementing Resettlement and Rehabilitation (R&R) measures, ensuring a transparent and equitable transition for affected populations.

2.7 Aim of the Study

The aim of the study is to conduct a Social Impact Assessment study in accordance to approved GUIDELINES of **Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation & Resettlement Rules, 2013**(RFCTLARR)

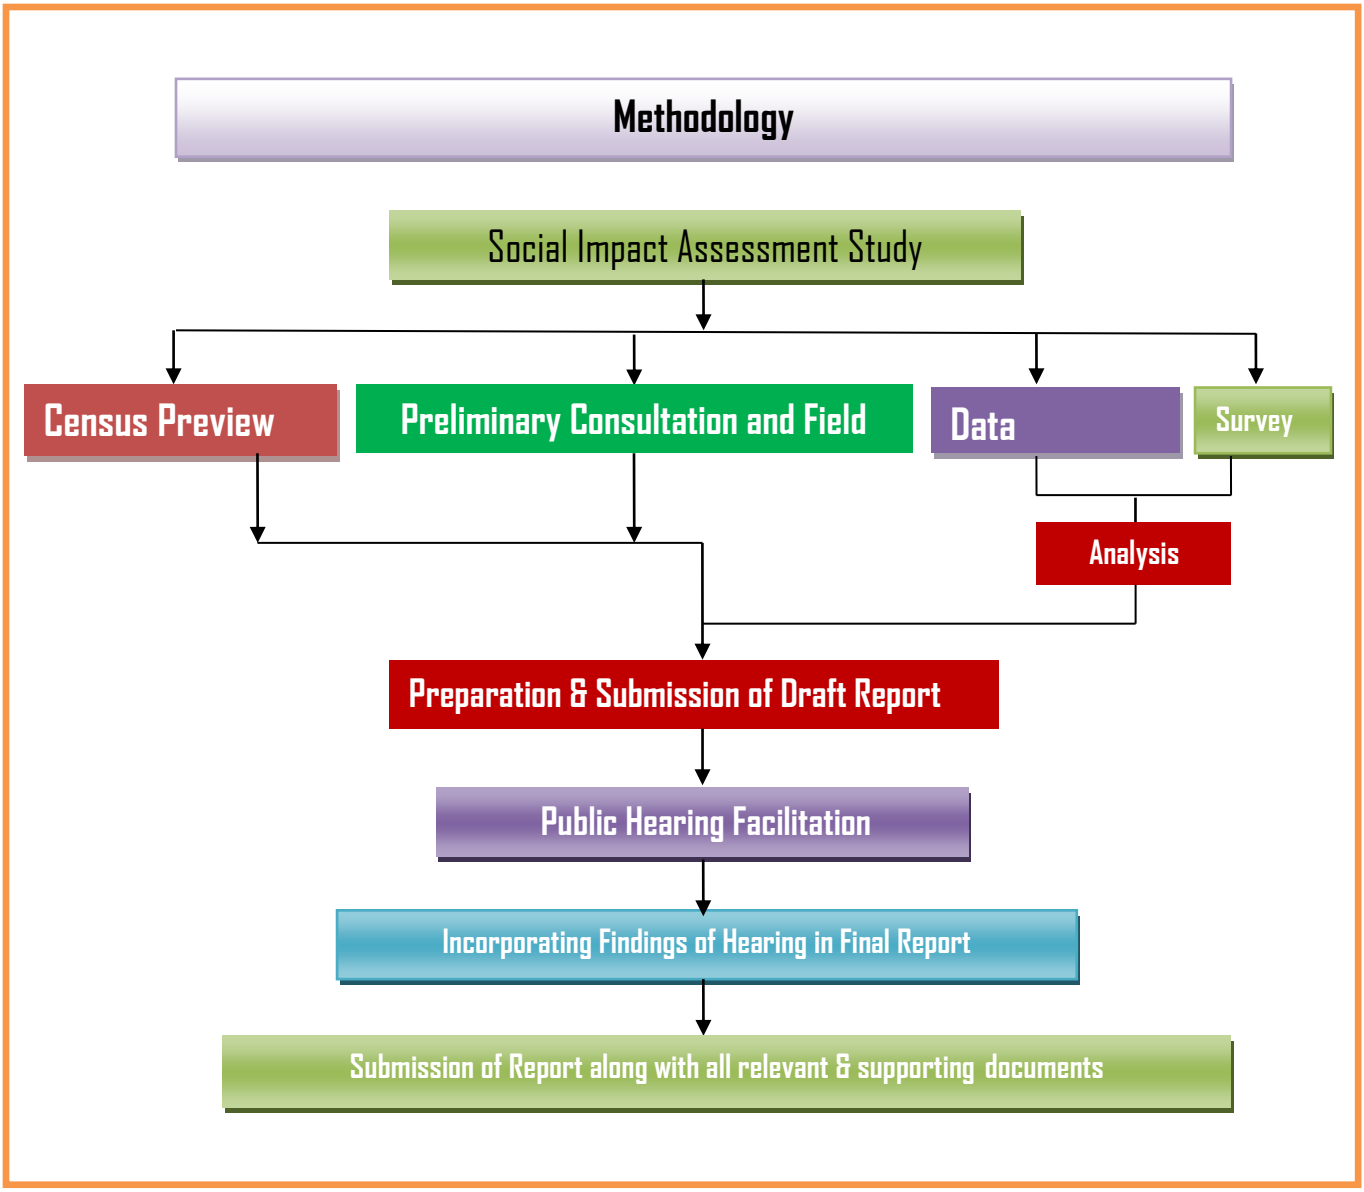
2.8 Approach & Methodology

The Social Impact Assessment (SIA) has been conducted in accordance with the RFCTLARR Rules 2013. The methodology for the SIA study is based on the following key components:

- Group discussions with villagers to assess the overall impact of the project on the village's socio-economic and environmental conditions, utilizing Participatory Rural Appraisal (PRA) tools such as Village Surveys and Social-Resource Mapping.
- A comprehensive evaluation of the socio-economic status of individuals who may face negative impacts, carried out through Focus Group Discussions (FGDs) and surveys.
- Engagement with Project-Affected Families (PAFs) to understand their concerns and needs.
- Focus Group Discussions (FGDs) and interactions with both Land-Loser and Non-Land-Loser Families to assess the direct and indirect impacts on all affected households.

This approach ensures a thorough and inclusive understanding of the social impacts of the project on the community.

Figure 1: Approach Methodology



2.9 TOOLS USED TO COLLLECT INFORMATION FOR SIA DATA FROM SECONDARY SOURCES

Data from Secondary Sources

Information from secondary sources was gathered from a variety of platforms, including the District Land Acquisition office, Census data, relevant departments, and other relevant literature. This secondary data helped the primary data collected through field surveys from the affected individuals and other stakeholders. This approach provided a comprehensive understanding of the physical, social, economic, and cultural context of the project area before detailed field investigations began.

2.10 Site Visit and Information Dissemination

The SIA team conducted site visits to verify the project map and identify the affected areas. Once the area was identified, the survey team consulted with the local Mukhiya (PRI) and other resource persons at the project site. They also organized Focus Group Discussions (FGDs) with the villagers to gather their perspectives and concerns about the Land Acquisition process. Additionally, meetings were held with the stakeholders who would be affected, ensuring they were well-informed about the project and the survey procedures.

2.11 Baseline Socio- Economic Profile

Following the enumeration and verification of potentially affected plots in the project area, efforts were made to conduct a comprehensive Village Socio-Economic Survey and household-level assessments to understand the impact of the proposed project on the socio-economic conditions of affected families. The surveys were carried out using pre-tested formats for the "Village Survey" and a "Household Questionnaire." These questionnaires focused on gathering information such as identification details of Project-Affected Families (PAFs), their social profiles, family details, occupations, sources of income, family expenditures, documents proving ownership, and details of affected structures. The survey also collected data on commercial/self-employment activities, employment patterns, land types, land use, and the opinions and views of PAFs regarding the project, resettlement, and rehabilitation. Both open-ended and close-ended questions were included in the questionnaire to capture a comprehensive range of responses.

2.12 Limitations of the Study

- Some household members were unavailable during the survey, and unwilling to participate in primary data collection.
- Some individuals were hesitant to share sensitive information regarding their income, land ownership, or living conditions due to fear of legal, financial, or social consequences.

2.13 Survey and Sampling Methodology

For carrying out the SIA survey the stakeholders were divided into 2 categories, i.e. primary stakeholder and secondary stakeholder.

2.13.1 Primary Stakeholder

This group includes the owners of the land to be acquired, their families, individuals whose names are recorded in the jamabandi, those claiming partnership in the property, and anyone who relies on the land for their livelihood or other dependencies.

2.13.2 Secondary Stakeholder

It comprises the villagers who will be indirectly impacted by the land acquisition, including those who may experience socio-economic or environmental changes as a result of the project.

2.13.3 Sampling Methodology

For the directly impacted individuals and primary stakeholders, a 100% survey methodology was employed to ensure comprehensive data collection. In addition, Focus Group Discussions (FGDs) and village meetings were conducted to assess the broader impact of the project on the villagers and gain insights into the concerns and perspectives of the community.

2.13.4 Sample Design

To ensure a comprehensive analysis, all affected households were surveyed. Additionally, for a comparative impact assessment, 156 non-affected households from the same village were included as a control group. In total, 1106 households were surveyed, which consisted of 950 affected households and 156 non-affected households (control group). This approach allowed for a thorough understanding of the project's impact on both the directly affected and unaffected populations.

Table No.04: Details of Stakeholders Consulted

Category	Particulars	Method Adopted	Total No. Of Households	No. Of Units (Household) Surveyed	Sample Size Covered
Primary Stakeholder	Raiyats whose land are acquired (Land Losers) Land owners with legal documents	Interview Through Questionnaire& FGD	1050	950	91.71%
Secondary Stakeholders	Other Villagers (Non-Land Losers)	Interview Through Questionnaire& FGD	156	156	100%

Source: Field Survey

2.14 Data Sources Used

The data sources used for the study can be broadly categorized into two main types:

2.14.1 Primary Sources

a) **Household (HH) Surveys**

Data was collected through surveys conducted with both primary and secondary stakeholders. These surveys provided insights into the socio-economic conditions and potential impacts on affected households.

b) Opinion and Impact Assessment Surveys (Focus Group Discussions - FGD)

These surveys were conducted to assess the potential impacts of the proposed project and gather the views of various stakeholders regarding the project. Stakeholders included villagers living in proximity to the project site, allowing for a comprehensive understanding of community perceptions and concerns.

2.14.2 Secondary Source

a. Census of India
b. RFCTLARR, 2013

CHAPTER-III

LAND ASSESSMENT

3.1 Land Holding Pattern of the affected Households

The total land required for the **"Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)"** spans 96.2210acres, located in the villages Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District.

This area comprises 575 private plots. A detailed summary of the land proposed for acquisition in each village is outlined in Table no.06. The acquisition is part of the process to support the development of the steel plant, which is expected to play a significant role in the region's industrial growth. Further details regarding the specific land distribution and other relevant information can be found in the table provided.

Table No. 06: Details of Land Acquisition

Land Details: Establishment of Industries For External Rail Connectivity to Plant		
Tehsil: Hindol & Odapada	**District: Dhenkanal**	
S. No.	**Village**	**Area to be Acquired (in Ac.)**
1	Jhadabandha	7.7600
2	Haladia Bahal	41.2250
3	Kalusau Kateni	3.9000
4	Meramandali	3.4560
5	Nayabhagirathipur Paschimabad	1.6400
6	Nimidha	14.6400
7	Salapada	2.2000
8	Uparapal	21.4000
Total		**96.2210**

Source: Field Survey

3.2 Average Size of land holdings

The field study reveals that the average size of land holdings in the affected villages is approximately 5.97 acres.

Table No. 07: Average Size of land holdings (in Acres)

S. No.	Village	Area to be Acquired (in Ac.)	No. Of Affected Plots	Average Size Of Land holdings (in Acres)
1	Jhadabandha	7.7600	26	3.35
2	Haladia Bahal	41.2250	223	5.40
3	Kalusau Kateni	3.9000	45	11.53
4	Meramandali	3.4560	23	6.65
5	Nayabhagirathipur Paschimabad	1.6400	10	6.09
6	Nimidha	14.6400	89	6.07

3.3 Type of land

The position of different categories of land available was studied and it was found that, the land of project area is mainly cultivable monocropping Rainfed Agriculture.

3.4 Nature of Land Ownership

The study examined the nature of land ownership among the affected households. The following table illustrates the number of titleholders and other landholders who possess land through inheritance rights.

Table No. 08: Nature of Ownership

Villages	No. Of Title Holder(as per land records)	No. Of Legal Heirs (Inheritance rights)
All 08 Villages Combined (**Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal**)	**267**	**950**

2	Few Encroachments under the project area	0	---

3.5 An Analysis of Land Acquisition of the project

The proposal is to take Land Acquisition of 96.2210 acres of Private Land from village Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District.Since the proposal is to take the land from above 8 Villages, which is mostly vacant, used for agriculture purpose only, the project is not likely to have a large area of negative impact.

The major area of the acquisition is the area in the vicinity of the project land, for this FGD & Interview was conducted with 950 Land losers Family in Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District. The primary stakeholders would be the raiyats whose land is to be acquired. The selected land measures 96.2210 acres, which is categorized into approx. 950 are Legal Heirs.

Table No. -09: Summary of Land Assessment

S.No.	Particulars	Details
1	Details of Land inventories along with details of Khasra map and Ownership available?	Yes
2	Demarcation of Area of Impact	Yes
3	Location of proposed land to be acquired	Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tehsil of Dhenkanal district
4	Quantity of proposed land to be acquired	96.2210 acres, comprising of Dhenkanal district
5	Present Use	Uncultivable land /Barren land and is vacant. No residential or commercial structures were found.
6	If Any Land Already purchased, alienated, leased or acquired for the purpose of the project	The Land can be categorized into following- 1. Legal land Owners- 950 HH from 537 plots covered out of total 575 private plots.
7	If the land is agricultural land, any irrigation coverage and cropping Patterns	Few are agricultural land, single cropping and mainly rainfed agriculture.
8	Nature and Present use of land	Monocropping and mainly rainfed agriculture, mostly vacant
9	Details available for size of Holdings, ownership patterns, Land Distributions and number of residential Houses	Yes, as per HH Survey & Number of residential houses- 00.

CHAPTER-IV
ESTIMATION & ENUMERATION OF AFFECTED FAMILIES AND ASSESTS

4.1 Details of Affected Families

The primary stakeholders in this land acquisition are the raiyats whose land is being taken. The total area to be acquired spans 96.2210 acres, comprising 575 plots, which are held by approximately 950 legal heirs. Other than the families directly involved, there are no other parties who will be significantly affected by the acquisition.

According to the survey, there is no indication that any of the stakeholders rely on the proposed land for their livelihood, and none of the stakeholders reside on the land earmarked for acquisition. However, the survey did identify 00 residential structures within the acquisition area. These few families and individuals will be directly impacted by the land acquisition, and as such, appropriate rehabilitation and resettlement measures will need to be implemented to mitigate these effects.

4.2 Indirectly Impacted

The survey of secondary stakeholders shows that the land acquisition will not negatively impact any families or individuals, as none of them live on or rely on the proposed property for their livelihood.

CHAPTER-V
Socio-Economic And Demographic Profile Of The Project Area

5.1 Demographic Details of the Population

5.1.1 District Profile

Dhenkanal is a district in the state of Odisha, India, known for its historical significance, agricultural productivity, and growing urbanization. The district is believed to be named after a Savara tribal chief, 'Dhenka', who once ruled this region. With its vast forests and wildlife, Dhenkanal is often referred to as the "Home of Elephants and Tigers." Geographically, it lies between 85°58' E to 86°02' E longitude and 20°29' N to 21°11' N latitude. The district spans a total area of 4452 square kilometers, the district is intersected by National Highway 55 (Cuttack-Sambalpur Road) and the Cuttack-Sambalpur (Baranga-Sambalpur) railway line**,** ensuring strong connectivity. It shares boundaries with Kendujhar to the north, Cuttack to the south, Jajpur to the east, and Angul to the west**.** According to the 2011 Census, Dhenkanal had a total population of 1,192,811 people. Among them,1,175,06 individuals resided in urban areas, while 1,075,305 people lived in rural regions. The sex ratio of the district stood at 947 females per 1,000 males, indicating a slightly lower proportion of women compared to men. The population density was recorded at 267.93 inhabitants per square kilometre. In terms of housing, Dhenkanal had approximately 279,364 households, with 259,18 houses located in urban areas and 253,446 houses in rural regions.

For governance and development purposes, Dhenkanal district is systematically divided into 03 Subdivisions, 08 Tahasils, 198 Gram Panchayats, 04 Urban Bodies and 08 Community Development Blocks (C.D. Blocks). In India, a Community Development Block (C.D. Block) is an administrative unit that facilitates rural development, often serving as the next level of governance below the tehsil or taluka. Each C.D. Block is overseen by a Block Development Officer (BDO) and encompasses multiple gram panchayats, which are local self-governing bodies responsible for village-level administration and development. These blocks play a crucial role in implementing government schemes, infrastructure projects, and social welfare programs.

Dhenkanal district is administratively divided into 03 subdivisions, ensuring effective governance and smooth execution of development initiatives across both rural and urban areas. The structured division of the district helps in the efficient delivery of public services, including education, healthcare, and rural development programs. Dhenkanal experiences a tropical climate, with hot and humid summers during April and May, cooler winters in December and January, and monsoons typically setting in by June. The district receives an average annual rainfall of 1,421.1 mm. Agriculture plays a vital role in the local economy, with paddy, groundnut, cashew nut, potato, mango, jackfruit, sugarcane, and various vegetables being the main crops.

Dhenkanal is known for its vibrant festivals, deeply rooted in tradition and celebrated with great enthusiasm. Among them, Gajalaxmi Puja is one of the most significant. This festival, dedicated to Goddess Lakshmi, begins on Kumar Purnima and continues for eleven days, attracting thousands of devotees who participate in the grand celebrations.

Another prominent festival is Mahashivratri at Kapilash, where Lord Chandrashekhar's temple becomes the center of religious activities. The highlight of this festival is the **"**Jagar Yatra," an all-night vigil and spiritual gathering that brings devotees together from across the region. Similarly, the Dussehra festival in Kamakhyanagar holds special cultural significance, marked by grand processions, traditional performances, and rituals.

One of the most unique religious gatherings in Dhenkanal is the Maghamela at Joronda, dedicated to Mahima Dharma. This festival begins on Magha Purnima and lasts for four days, drawing followers from different parts of Odisha and beyond. Devotees engage in prayer, meditation, and spiritual discourses, emphasizing simplicity and devotion.

Apart from religious festivals, Dhenkanal also hosts events that showcase its cultural heritage. The Bullock Festival of Bhuban is a one-of-a-kind event where bullocks participate in racing competitions, and the winning owners receive prizes. This festival reflects the deep connection between the local community and their agrarian traditions.

These festivals not only preserve the rich cultural identity of Dhenkanal but also bring people together, fostering a spirit of unity and celebration. Whether through religious observances, traditional fairs, or folk performances, the district continues to be a lively hub of Odisha's heritage.

5.2.1 HINDOL- BLOCK PROFILE

Hindol is a town and tehsil located in Dhenkanal district of Odisha, serving as an administrative sub-division responsible for local governance, development, and revenue management. It plays a key role in supporting the region's infrastructure and community welfare. Based on Census 2011 data, Hindol tehsil covers an area of 245 square kilometers and has a population of 44,159 residents. The population density stands at approximately 180 people per square kilometer, with 10,877 households spread across the area. Hindol tehsil encompasses 55 villages, each connected to its respective Gram Panchayat and nearby towns, contributing to the area's social and economic framework. This tehsil stands as an integral part of the district, blending cultural heritage with ongoing developmental efforts to uplift the local communities.

Population Details

Hindol Block, situated in the Dhenkanal district of Odisha, has a total population of 44,159 people, as per the 2011 Census. This includes 22,512 males and 21,647 females, with 10,877 families residing across the block. Children aged 0-6 years make up 12% of the total population, numbering 5,312 — comprising 2,803 boys and 2,509 girls.

Literacy Level

The literacy rate in Hindol tehsil is 73.11%, with a gender breakdown of 71.11% literacy among males and 57.25% among females, highlighting a noticeable gender gap in education.

Sex Ratio

The Average Sex Ratio stands at 962 females per 1,000 males, reflecting a fairly balanced gender distribution. The Child Sex Ratio in this age group is 895 girls per 1,000 boys, which falls below the block's Average Sex Ratio of 962.

TABLE OF BLOCK DATA

The data shown in below table 14 represents the Children population, literacy rate, Scheduled Caste population, Scheduled Tribe Population and the Sex Ratio population of Hindol block.

PARTICULARS	TOTAL	MALE	FEMALE
Children (Age 0-6)	5,312	2,803	2,509
Literacy	73.11%	71.11%	57.25%

5.2.2 ODAPADA -BLOCK PROFILE

Odapada is an administrative tehsil located in the Dhenkanal District of Odisha, India. The tehsil headquarters is situated in the town of Odapada, serving as a focal point for local governance and administrative activities. Spanning a total area of 31,557.50 hectares, Odapada encompasses a mix of rural and semi-urban settlements. Positioned at an elevation of 64 meters above sea level, Odapada is strategically located near major cities such as Dhenkanal, Talcher, Anugul, and Bhuban, enabling access to essential economic and social services. Despite its proximity to these cities, there is no railway station within a 10-kilometer radius, making roadways the primary mode of transportation.

The tehsil is well-connected by two major national highways – NH 55, located approximately 24.4 km away (Angul Bypass), and NH 655, around 27.3 km away (Angul - Narasinghpur Road). These routes link Odapada to key industrial and commercial areas, contributing to its economic development. Additionally, Odapada is close to several prominent tourist attractions, such as the Nandankanan National Park, Cuttack, Bhubaneswar, Chilika Lake, and the historic city of Puri, making it a potential area for eco-tourism and cultural exploration.

Population Details

Odapada is a tehsil located Dhenkanal district, Odisha. According to the 2011 Census, the tehsil has a total population of 39,759 people — comprising 19,745 males and 20,014 females. This results in an Average Sex Ratio of 1013 females per 1,000 males.

Literacy Level

Odapada boasts an impressive literacy rate of 71.1%, significantly higher than Dhenkanal district's average of 69.6%. With 28.9 % population as illiterate.

Sex Ratio

The Average Sex Ratio of the block is 1013 females per 1,000 males. The Child Sex Ratio stands at 920 girls per 1,000 boys, which is noticeably lower than the block's overall sex ratio of 1013.

TABLE OF BLOCK DATA

The data shown in below table 15 represents the Children population, literacy rate, Scheduled Caste population, Scheduled Tribe Population and the Illiterates of Odapada block.

PARTICULARS	TOTAL	MALE	FEMALE

5.3.6 VILLAGE PROFILE

Salapada is a small village located in Odapada Tehsil, within the Dhenkanal district of Odisha, India. It falls under the Odapada Community Development (C.D.) Block. Salapada has a total population of 63 residents, distributed across 15 households. The village is governed by the Nayabhagirathipur Paschimabad Gram Panchayat.

Geographically, Salapada spans an area of 25.5 hectares, of which 3.35 hectares are classified as non-agricultural land. It is situated approximately 9 kilometers from the Odapada Tehsil Headquarters and about 35 kilometers from the Dhenkanal District Headquarters. The nearest town with municipal status is Dhenkanal, located 33 kilometers away. The village's postal code is 759121.

Population Details

Salapada village is situated in the Dhenkanal district of Odisha, has a total population of 63 people, as per the 2011 Census. This includes 33 males and 30 females, with 15 families residing across the village. Children aged 0-6 years make up 11.11% of the total population, numbering 07 — comprising 04 boys and 03 girls.

Literacy Rate

Salapada boasts a remarkable literacy rate. As of the 2011 Census, the village's literacy rate reached 94.64%, significantly higher than Odisha's average of 72.87%. Male literacy is 96.55%, while female literacy is an impressive 92.59%.

Sex Ratio

The village's average sex ratio is 909 females per 1,000 males — lower than the Odisha state average of 979. The child sex ratio in Salapada stands at 750 girls per 1,000 boys, also lower than the state average of 941.

Caste Factor

Scheduled Caste (SC) comprises of 12.69%, while the village has no Scheduled Tribe (ST) population.

Working Population

Out of the total population, 17 individuals are engaged in work. Among them, 100% are involved in **Main Work** — meaning employment lasting more than six months — while 0% rely on **Marginal Work** for less than six months. Below is the table which represents the total Workers population and the distribution of Main & Marginal Workers.

Below is the table which represents the total Workers population and the distribution of Main & Marginal Workers.

Table: 21 Distribution of Main Workers & Marginal Workers

	Workers	Main Workers	Marginal Workers
TOTAL	17	17	0
MALE	15	15	0
FEMALE	02	02	0

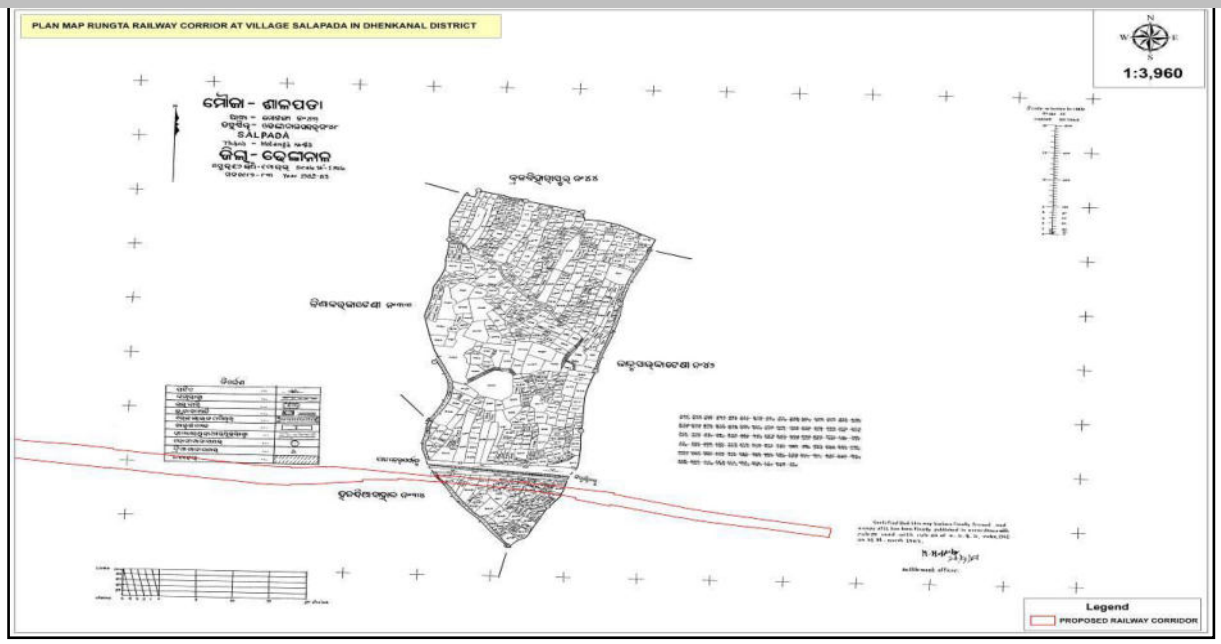
VILLAGE MAP



5.3.7 VILLAGE PROFILE

Kalusahukateni is a village located in the Odapada block of Dhenkanal district, Odisha. It falls under the Odapada Community Development (C.D.) Block. According to the 2011 Census, the village comprises 167 households with a total population of 753 residents out of which 390 males and 363 females.

Population Details

Based on Census 2011 data, Kalusahukateni village has 167 families, totaling a population of 753 residents. Among them, 390 are males and 363 are females. Children aged 0-6 years make up 10% of the population, totaling 77 children, including 47 boys and 30 girls.

Literacy Rate

Kalusahukateni stands out for its high literacy rate of 97.5%, significantly surpassing Dhenkanal district's average literacy rate of 69.6%. Male literacy is at 98.54%, while female literacy is also impressive at 96.4%.

Sex Ratio

The average sex ratio of the village is 931 females per 1,000 males while the child sex ratio is 638 girls per 1,000 boys, which is notably lower than the village's overall sex ratio of 931.

Caste Factor

The village's social composition includes 27.9% of the population belonging to the Scheduled Caste (SC) community, while no residents were recorded under the Scheduled Tribe (ST) category.

Working Population

Among the total population, 184 individuals are engaged in work-related activities. Notably, all working residents (100%) reported their employment as "Main Work" — meaning they were employed for six months or more — with no one classified under "Marginal Work" (employment for less than six months).

Below is the table which represents the total Workers population and the distribution of Main & Marginal Workers.

Table: 22 Distribution of Main Workers & Marginal Workers

	Workers	Main Workers	Marginal Workers
TOTAL	184	184	0
MALE	179	179	0
FEMALE	05	05	0

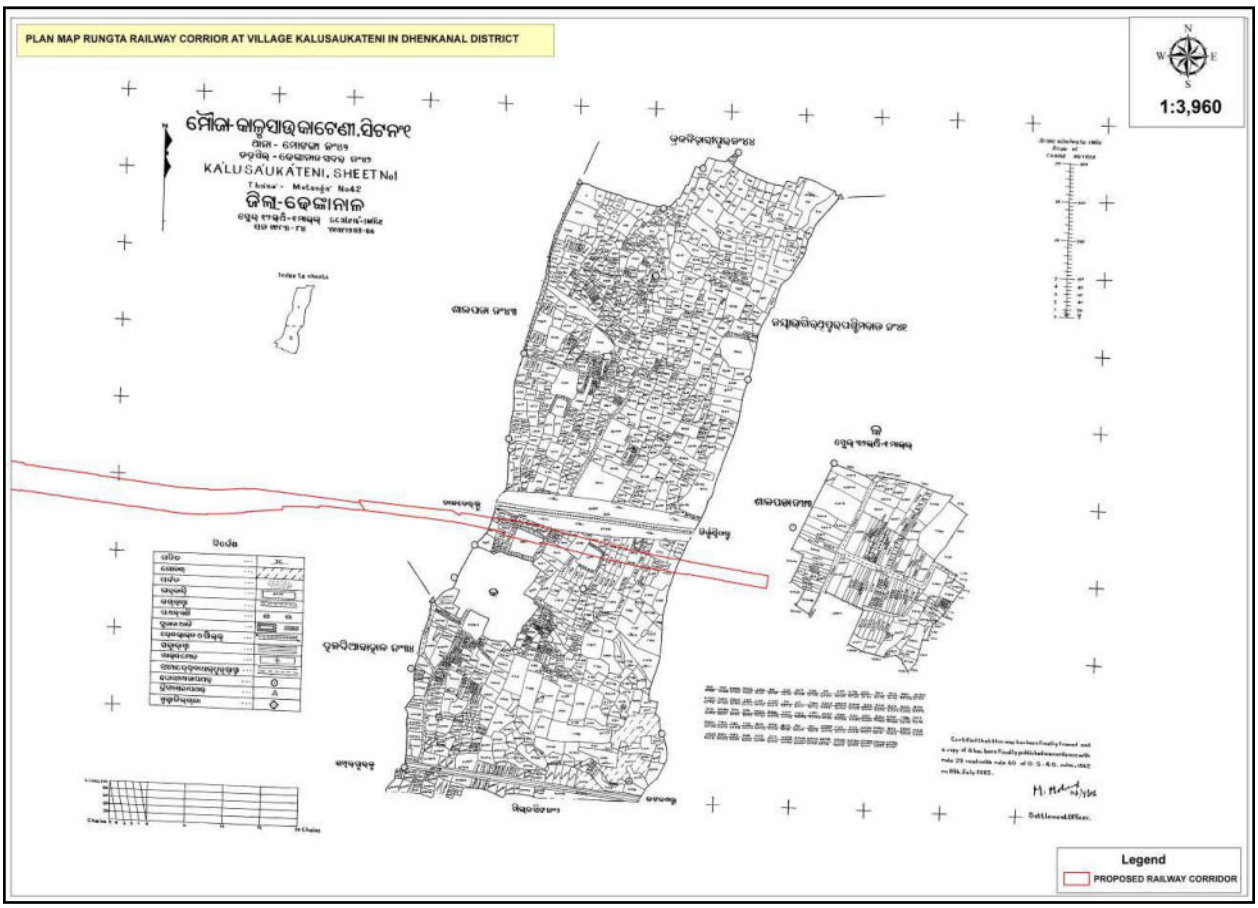
VILLAGE MAP



5.3.8 VILLAGE PROFILE

Haladibahali is a village located in the Odapada tehsil of Dhenkanal district, Odisha, India. It lies approximately 10 kilometers from the Odapada tehsil headquarters and 36 kilometers from Dhenkanal district headquarters. The village spans a total area of 384 hectares and is home to 1,662 residents comprising 867 males and 795 females. Haladibahali contains around 407 households, contributing to a close-knit rural setting. The village's pincode is 759121.

Population Details

As per the Population Census 2011, there are a total of 407 families residing in the village Haladibahali. The total population of Haladibahali is 1,662 out of which 867 are males and 795 are females thus the Average Sex Ratio of Haladibahali is 917. The population of Children aged 0-6 years in Haladibahali village is 186 which is 11.19% of the total population. There are 99 male children and 87 female children between the age 0-6 years.

Literacy Rate

As per the Census 2011, the literacy rate of Haladibahali is 89.4%. Thus Haladibahali village has a higher literacy rate compared to 69.6% of Dhenkanal district. The male literacy rate is 95.7% and the female literacy rate is 82.49% in Haladibahali village.

Sex Ratio

The average sex ratio of the village is 917 females per 1,000 males while the Child Sex Ratio of Haladibahali is 879 which is less than Average Sex Ratio (917) of Haladibahali village.

Caste Factor

Schedule Caste (SC) constitutes 27% while Schedule Tribe (ST) were 0% of total population in Haladibahali village.

Working Population

In Haladibahali village out of total population, 540 were engaged in work activities. 87% of workers describe their work as Main Work (Employment or Earning more than 6 Months) while 13% were involved in Marginal activity providing livelihood for less than 6 months.

Below is the table which represents the total Workers population and the distribution of Main & Marginal Workers.

Table: 23 Distribution of Main Workers & Marginal Workers

	Workers	Main Workers	Marginal Workers
TOTAL	540	470	70
MALE	472	441	31
FEMALE	68	29	39

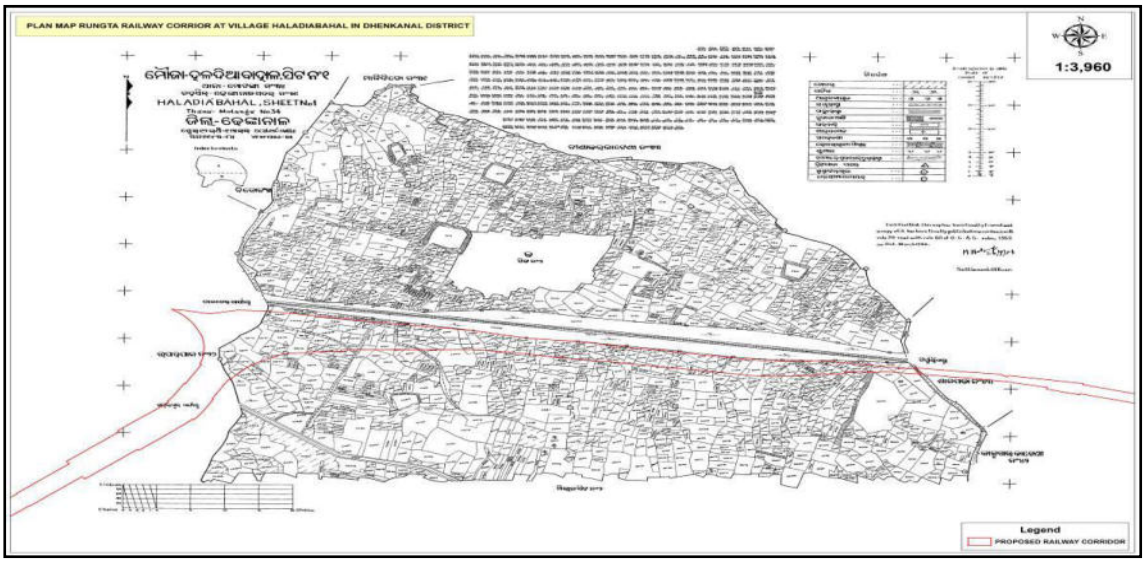
VILLAGE MAP



CHAPTER-VI

Socio-Economic & Demographic Profile of Affected Households

6.1 Socio-Economic & Cultural Profile

This chapter examines the socio-economic conditions of households (HHs) directly and indirectly affected by the project, along with their access to essential infrastructure. As outlined in Table 24, a total of 1106 households were surveyed, including 950 affected HHs and 156 non-affected HHs. The non-affected households, selected from the same villages, serve as a comparative group for impact assessment.

In the affected villages Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District—950 legal owner HHs will experience loss of land due to the proposed **Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)**.This project is expected to impact approximately 3250 individuals, comprising 1783 males and 1467 females, from the 950 project-affected families.

Table No.24: Household and Gender wise population Coverage

Villages	Affected				Non-Affected			
	Total Surveyed PAFs	Total PAPs	Gender		Total Surveyed PAFs	Total PAPs	Gender	
			Male	Female			Male	Female
08 Villages of Hindol & Odapada Tehsil of Dhenkanal, **District**	950	3250	1783	1467	156	417	234	183

Source: Field Survey

6.2 Gender-Wise Distribution of Persons

As regards gender-wise affected population, male members (54.86%) are more than the female members (45.13%). While the non-affected population stands with (56.11%) male members and (43.88%) female members.

Table No. 25: Village wise distribution of Affected and Non-affected Persons by Gender

Villages	Affected				Non-Affected			
08 Villages of Hindol & Odapada Tehsil of Dhenkanal, District	**Male**	**Female**	**Total**	**Sex Ratio**	**Male**	**Female**	**Total**	**Sex Ratio**
	1783	**1467**	**3250**	**823**	**234**	**183**	**417**	**782**

Source: Field Survey

6.3 Vulnerability Status of HHs

As regards the existence of vulnerable HHs in the villages, categories of people were taken as vulnerable namely (i) physically challenged. It is found that out of total 950 project affected HHs, none are vulnerable HHs. Similarly, out of non-affected HHs, none are vulnerable HHs.

Table No. 26: Vulnerability status of Households (Affected and Non-Affected)

Villages	Affected		Non-Affected	
08 Villages of Hindol & Odapada Tehsil of Dhenkanal, District	Headed by Physically Challenged Person	Total	Headed by Physically Challenged Person	Total
	0	**0**	**0**	**0**

Source: Field Survey

6.4 Marital Status

In the present study, marital status has been classified into three categories: (i) married, (ii) unmarried, and (iii) widow/widower. Additionally, divorced individuals were recorded separately. During the verification of marital status among the affected households (HHs), it was observed that out of a total of 3,250 individuals, 1,061 (32.65%) were unmarried, 1,944 (59.81%) were married, 210 (6.46%) were widowed, and 2 individuals (0.06%) were divorced.

6.5 Level of Education

An assessment of the educational qualifications of the 3,250 affected individuals has been carried out. The findings reveal that 55 individuals have completed Pre-Primary education, while 603 have attained Primary education. A total of 730 individuals have received Secondary education, and 208 have completed Higher Secondary education. Additionally, 321 individuals hold a Graduate degree, 22 individuals have completed Postgraduate studies, and 19 individuals possess a Diploma. Furthermore, 3

individuals have earned a Ph.D., 16 individuals have completed ITI training, and 9 individuals hold a degree in other professional courses. It is important to note that educational data for 1,212 individuals is not available.

6.6 Occupational Status of Project Affected Families

As part of this report, an analysis of the primary and subsidiary sources of livelihood for the affected families has been conducted. The findings indicate that 12.58% of the affected families are employed in various sectors, while 7.23% depend on farming and cultivation as their main source of income. A significant share, 58.30%, is categorized as unemployed, which also includes children, homemakers, and senior citizens. Additionally, 2.55% of the families are employed in government services, and 17.72% are engaged in business activities. Retired individuals account for 0.67%, while livelihood data for 0.70% of the families is not available.

6.7 Key Findings

I. Total of 1106 surveyed households (HHs), 950 HHs are affected families and 156 Non-affected families.
II. A total of 3,250 project affected persons will be impacted, comprising 1,783 males and 1,467 females, belonging to the 950 project-affected families.
III. Marital status analysis shows that among the affected individuals, 1,061 (32.65%) are unmarried, 1,944 (59.81%) are married, 210 (6.46%) are widowed, and 2 (0.06%) are divorced.
IV. It was found that none of the 950 project-affected families fall under the vulnerable category.
V. The educational profile of the affected individuals is as follows: 55 individuals have completed Pre-Primary education, 603 individuals have completed Primary education, 730 individuals have attained Secondary education, 208 individuals have completed Higher Secondary education, 321 individuals hold a Graduate degree, 22 individuals have completed Postgraduate studies, 19 individuals possess a Diploma, 3 individuals hold a Ph.D., 16 individuals have completed ITI training, and 9 individuals have degrees in other professional courses. Educational data for 1,212 individuals was not available.
VI. Primary and subsidiary sources of livelihood among the affected families reveal: 12.58% are employed in various private sectors, 7.23% depend on farming and cultivation, 2.55% are employed in government jobs, 17.72% are engaged in business activities, 0.67% are retired individuals, and 58.30% are categorized as unemployed (including children, homemakers, senior citizens and other unemployed individuals). Additionally, for 0.70% of individuals, livelihood data was unavailable.

CHAPTER-VII

Social Impacts

7.1 Framework & Approach to Identifying Impacts

The Social Impact Assessment (SIA) is an essential tool used to predict the potential social consequences of development projects. It enables decision-makers to anticipate possible negative impacts and take proactive measures to mitigate them before they occur. SIA also provides valuable insights into social and cultural factors that should be considered when making decisions affecting local communities.

The process of conducting an SIA is structured to involve all relevant stakeholders, ensuring a comprehensive and systematic evaluation of potential impacts. Below is a refined framework for identifying and assessing the impacts of a proposed project:

Framework & Approach for Identifying Social Impacts are shown in following steps-

i. Formation of the SIA Team
ii. Literature Review
iii. Engagement with Stakeholders
iv. Data Collection
v. Data Processing
vi. Reporting and Recommendations

By following this structured approach, SIA enables a thorough evaluation of the potential social impacts of development projects, guiding decision-makers toward more informed and socially responsible choices.

7.2 Description of Impacts at various stages of project cycle

The social impact assessment for the acquisition of land for the Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001) at Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District identifies the social impacts at different stages of the project. These stages include -

i. Impact during Pre-construction stage,
ii. Impact during Construction stage,
iii. Impact during Operational stage.

The primary objective of the Social Impact Management Plan (SIMP) is to mitigate adverse social impacts while enhancing the positive effects of the project. The social impact management measures will be carried out during the various stages of the project, including the Pre-construction, Construction, and Operational stages. These measures are designed to address the social challenges and opportunities that arise at each stage. The impacts are identified through consultations with local villagers, ensuring their concerns and inputs are incorporated into the planning process. A detailed description of the identified impacts, as well as the corresponding management measures, is presented in above table 00, focusing on how to minimize negative outcomes and maximize benefits throughout the project's lifecycle.

Table No. 27: Assessment of Social Impacts at different Phases of Project

S.No.	Pre-Construction Stage	Construction Stage	Operation Stage
1.	Acquisition of Land	Dust, Noise Pollution	Establishment of Industries For External Rail Connectivity to Plant creating employment opportunities
2.	Loss of Livelihood	Employment during Construction	

Source: Field Survey

During the field survey conducted in the affected Mouzas, households in the villages of Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District—were found to be well aware of the proposed project. Researchers engaged with the villagers and households, seeking their perspectives on the anticipated social and economic benefits, as well as potential challenges associated with the project.

To comprehensively assess the project's impact, interactions were conducted with key stakeholders through structured household surveys for both affected and non-affected HHs, along with Focus Group Discussions (FGDs) with village residents. Households were asked to share their opinions on various aspects, including the project's potential effects on family dynamics, local development, the economy, employment opportunities, property values, housing displacement, sustainable livelihoods, production growth, savings potential, and overall standard of living.

7.3 Overall Impacts

The anticipated impact of the project can be summarized as follows:

- According to the affected families, the project is expected to have a positive impact on local development, contributing to economic growth and infrastructure improvements.
- The project will result in the loss of no residential houses, as 00 residential structures were identified in the affected area. However, affected families/persons may still experience disruptions, necessitating appropriate rehabilitation and resettlement (R&R) measures.
- Community discussions revealed concerns that the proposed project may adversely impact sustainable livelihoods, as it involves the loss of agricultural land on which many villagers are heavily dependent. Additionally, residents expressed apprehensions regarding potential health risks associated with mining activities, including air and water pollution, which may further exacerbate their vulnerability.
- The local population expects the project to generate new employment opportunities, enhancing job prospects both during and after construction.

CHAPTER – VIII

Analysis of Benefits and Recommendation on Acquisition

8.1 Assessment of Social Costs and Benefits

Based on the proposal/ feasibility study, project costs and phases, core design features proposed infrastructural facilities, workforce requirements (temporary and permanent), outputs, risks, production targets etc. Some of the broad positive and negative impacts resulting from the project have been highlighted in the table.

Table No. 28: Positive and Negative Impacts of the Project

S. No.	Positive Impact	Negative Impact	Remarks
1	Establishment of Industries For External Rail Connectivity to Plant creating employment opportunities	Acquisition of Land	All the Impacts mentioned have been suggested by various Stakeholders throughout the survey. No such negative impact was observed by the stakeholders. However, negative impact, if any, from the project can be mitigated successfully then the proposed project will benefit the public at large.
2	Creation of direct & indirect Employment opportunities		
3	Local Employment at various stage of projects		

Source: Field Survey

Table No. 29: List of Possible Impacts

Impact Factor	Impacts on Primary Stakeholders	Impacts on Secondary Stakeholders
Land, House	- This is direct impact on all primary stakeholders. - No loss of houses and no dislocation of families - Loss of agriculture land	There is no such direct or indirect impact
Livelihoods and income	This is an indirect impact. At present no livelihood activity exists on proposed land under acquisition.	There will be no loss of livelihood activities (employment, etc.) to the secondary stakeholders
Physical Resources	There is no loss of any physical resources to the primary stakeholders	There is no loss of any physical resources to the secondary stakeholders
Private Assets	There will be loss of no private assets to the Primary stakeholders, as no Residential houses were observed within the area proposed to be acquired.	There will be no loss of any private assets to the secondary stakeholders.

	Therefore, no family is eligible for R&R Package.	
Public Services and utilities	There will be no loss of any public services and utilities to the primary Stakeholders	There will be no loss of any public services and utilities to the Secondary Stakeholders
Health	There are no possible negative impacts on health of primary stakeholders due to proposed acquisition and proposed settlement.	There are no possible negative impacts on health of secondary stakeholder, surrounding community due to the proposed acquisition and proposed Settlement on land.
Culture And Social Cohesion	No direct impact on culture and social cohesion.	No impact on culture and social Cohesion, provided land acquisition and compensation process is smooth.

Source: Field Survey

CHAPTER - IX

Social Impact Management Plan

9.1 Approaches to Mitigation

The Social Impact Management Plan (SIMP) has been developed to address and mitigate the negative social impacts arising from the acquisition of land for the Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)" at Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal District in accordance with the RFCTLARR 2013 guidelines.

The SIMP outlines a comprehensive set of mitigation, monitoring, and institutional measures to be implemented throughout the project's design, construction, and operational phases. These measures aim to either eliminate adverse social impacts or reduce them to acceptable levels. The primary goal of the SIMP is to ensure that negative impacts are minimized while enhancing the positive outcomes of the project. It will be carried out at each phase of the project: pre-construction, construction, and operational stages.

9.2 Measures to Avoid, Mitigate and Compensate Impact

i. Families must be clearly informed about the survey schedule, total compensation amount, and mode of payment. Any involvement of middlemen must be strictly avoided to ensure a fair and transparent process.
ii. After land acquisition, Raiyats (landowners) should be relieved from the burden of paying tax on the acquired land.
iii. In case of any dispute among stakeholders, it must be resolved before compensation is disbursed to ensure that payments reach the legal owners.
iv. During the construction phase, measures should be taken to minimize pollution levels and reduce environmental impact.
v. Compensation for acquired land must be fair and transparent.
vi. Payments should be made immediately, and proper follow-up actions should be taken to ensure alternative income generation opportunities for affected families.
vii. These 00 households must be included in the compensation package to ensure a just and inclusive rehabilitation process.

9.3 Rehabilitation & Resettlement Mitigation Measures

Rehabilitation and Resettlement (R&R) measures become necessary when there is involuntary displacement of affected individuals and families. In the proposed area of land acquisition, no residential structures have been identified within the affected zone. It is evident that the families and individuals residing in these structures will face adverse impacts due to the acquisition. Therefore, appropriate rehabilitation and resettlement measures must be implemented to mitigate the socio-economic disruptions and ensure a smooth transition for the affected population.

Table No. 30 : Analysis of the various possible social Impacts, and their proposed mitigation measures

S. No.	Type of Impact	Status	Proposed Mitigation Plan
1	**Loss of Land**	**Yes, there will be loss of land**	Compensation as per RFCTLARR Act 2013.
2	**Loss of Built-up Property**	**No**	
3	**Loss of Productive Assets**	**No**	
4	**Loss of Livelihood**	**Yes**	Compensation as per RFCTLARR Act 2013.
5	**Loss of Public Utility Lines**	**No**	
6	**Loss of Common Property Resources**	**No**	
7	**Loss of Access to Civic Services and Common property Resources**	**No.**	
8	**Loss of Cultural Properties**	**No**	
9	**Displacement of Vulnerable Groups**	**No- As no families will be dislocated**	

Source: Field Survey

9.4 Conclusion and Recommendations

This Social Impact Assessment (SIA) report presents a detailed evaluation of the potential social impacts associated with the "Establishment of Industries for External Rail Connectivity to Plant (TOR-63-00001)" at Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada, and Uparapal villages under Hindol and Odapada Tahsils of Dhenkanal District. The assessment covers 950 affected households, comprising approximately 3,250 individuals. The report is based on extensive field surveys, public consultations, Focus Group Discussions (FGDs), and inputs from key stakeholders, including the local administration and field officials.

The overall public perception of the project is positive, with strong community support for the land acquisition process. Most affected persons have expressed willingness to part with their land

in accordance with the provisions of the RFCTLARR Act, 2013, and Odisha RFCTLARR Rules, 2016. The project area primarily consists of a mix of agricultural and barren land. While some agricultural income loss is anticipated, appropriate compensation and livelihood restoration measures will be implemented to mitigate such impacts.

The establishment of industries for external rail connectivity is expected to significantly enhance logistics infrastructure, promote regional economic development, and create substantial direct and indirect employment opportunities for the local population. Importantly, no major environmental concerns, large-scale displacement, or community resistance were recorded during the consultations. The project is thus anticipated to catalyze industrial growth and improve the socio-economic conditions of the communities in the project-affected villages.

The findings of the study indicate that with careful implementation of the Rehabilitation and Resettlement (R&R) measures and adherence to applicable legal frameworks, the project will not only serve public purpose but also contribute towards the sustainable development of the Dhenkanal region.

9.5 Alternative Sites Found Not Feasible

The proposed Steel Plant shall be located in Jharbandh, Dhenkanal, Odisha. Since it is an existing site where construction is already on-going as per the environmental clearance dated 02.08.2010 for 1.9 MTPA, the Company plans to establish a higher capacity plant of 2.85 MTPA within the same area. The under construction units will be incorporated in the proposed configuration. The site has many advantages such as about 90% land is in possession of the company, water requirement from Brahmani river is located nearby (appx 10kms), source of power will be captive power plant of the company and railway siding can be constructed. The technology for various processes have been selected based on minimum environment pollution.

The IDCO and M/S Rungta Mines Ltd. examined the alternatives and finalized the proposed site. After a detailed discussion with the different authorities, the criteria and basic considerations adopted for comparative assessment of few alternatives to finally select the place for the project and to undertake land acquisition are the following.

Good connectivity –

Road link :- The proposed plant is accessible by all-weather road from the district headquarter Dhenkanal and town Angul, which are located at distances of 45 km and 32 km, respectively. The site is located on NH-42, at a distance of 4 km, which connects Bhubaneswar to Angul. Bhubaneswar is about 120 Km from State Capital Bhubaneswar, 45 KM from District Head quarter Dhenkanal, 32 Km from Angul and 8 Km from Meramundali (Railway Station) & 10 KM from Nayabhagirathipur Railway station. The location is well connected with Road & Rail.

Rail link :- The nearest railway station is Meramandali at a distance of 8 km. Angul 32 Km & 10 KM from Nayabhagirathipur Railway station.

Air link :- The nearest airport is BijuPatnaik International Airport, at Bhubaneswar which is 120 Km from Project area .

Water availability. Iron and steel making is a heat intensive process wherein a considerable quantity of cooling water is required for control of metallurgical processes as well as tor dissipation of unutilized heat. In order to conserve fresh water, water economy has been an underlying criterion for selection of plant and equipment. The total quantum of water requirement for the proposed project will be around 2950.00 Cum/ Hr. including domestic need. The main Source of industrial water shall be from the nearby river i.e. River Bramhani, which is flowing near to the plant i.e.at appx 10 KM away. The company also plans to apply for additional drawl permits from the concerned authorities. The company shall depend on its existing bore-wells for human consumption needs within the plant premise.

Social and economic benefits versus total costs -Talking about alternative sights/ route. For rail link from Nayabhagirathipur Railway Station to Dhenkanal Steel Plant(DSP) Jhadabandha, Dhenkanal. It turned out that there was no such options. The members of the study team convinced from the discussion that the people of the areas agreed about the route of rail link to the location of the project Dhenkanal Steel Plant(DSP) Jhadabandha, Dhenkanal. The proposed Railway Corridor connecting to 2.85 MTPA integrated Steel Plant Project at Jharbandh by M/S Rungta Mines Limited is built on the vacant area for Railway Link/ Corridor. The Proposed areas are selected to considering of less peoples will be affected and there are no rehabilitation/ Displace families & selected based on minimum environment pollution. The alternatives routes are not technically feasible.

9.5.1 Bare Minimum Requirement

As per the 4(I) notification of the Government, the SIA study must assess impacts in consultation with the concerned Gram Panchayat/Municipality within six months. In compliance, consultations were undertaken with local panchayats and stakeholders during the study. It is important to note that while the study formally considered the requirement of evaluating alternative sites, such options were found non-viable for extension of plant. Therefore, the chosen site remains inevitable for the project.

Furthermore, the land identified represents the bare minimum requirement for the expansion of the integrated steel plant. Any reduction in area would compromise plant layout, safety standards, and operational efficiency. Thus, the acquisition of the proposed land is justified and essential for project implementation.

9.5.2 Cost-benefit Analysis

In view of above, attempt has been made to undertake cost benefit analysis of Expansion to 2.85 MTPA integrated Steel Plant Project atJharbandh by M/S Rungta Mines Limited under Dhenkanal District. A similar problem is faced while estimating the cost and benefits in environmental analysis. Analysis of the present project involves assumption, which would be at the best inexact for policy implementation. Since it is a big project huge quantity of land is going to be acquired. But the perceived benefits visualised would be that it will help in creation of direct and indirect engagement or employment of the local people for their improvement of better live hoods.

Social Cost and Benefit

The proposed Expansion to 2.85 MTPA integrated Steel Plant Project (Phase-II) at Jharbandh by M/S Rungta Mines Limited will require lot of Officials, Engineers contract labourers during construction and implementation phase. They will be of educationally qualified, skilled, semi-skilled and non-skilled category. The non-workers (including marginal workers) in the study area constitute 60% of the total population indicating availability of sizeable manpower required for construction activity. As the labourers are generally non-skilled the labour would get opportunity for engagement during construction activity. In addition to the opportunity of getting engagement or employment as construction labourers, the local population would also have engagement opportunities in related service activities like small commercial establishments, small contracts, sub-contracts, supply of construction material etc. Also there will be more scope of selling products of household industry. Another important benefit is increase in wage rate which majority of the villagers have expressed before the study team during field survey. As majority of unskilled and semi-skilled persons will be from the surrounding villages, social & infrastructural benefits will extend to the local population. Improvement is expected in education facilities, health care services, road infrastructure and drinking water facilities. The budget for such corporate social responsibility (CSR) activities is subject to 2% of average profit of previous three years as per Companies Act 2013.

The Expansion to 2.85 MTPA integrated Steel Plant Project (Phase-II) at Jharbandh by M/S Rungta Mines Limited will also have its impact on social relations that exists presently in the populations of the project area. Influx of migrant labourers and will cause social conflict between guest and the host community at initial stages of development. But, this is expected to get stabilized in a short period. Increased employment opportunities will lead to economic upliftment of thelocalarea. This in turn will enhance the social status of local inhabitants, increased expenditure in festivals and social occasions, increased intra and inter village relations and cultural ties for expansion of the plant project.

In the current project, the eviction of land due to land acquisition, air-dust-noise pollution during construction and operation phase of the project. Most of the affected families opined thatthey have agreed of land acquisition for construction of Railway corridor condition to there is no

dumping and stockyard of material and alsothe above social value would be too high due to the project, as the loss of the land of the ancestors property could not be compensated for any amount of financial loss.

9.5.3 Estimation of affected families likely to be displaced

Based on the preliminary assessment and household survey, it is estimated that no affected families will face physical displacement due to the proposed land acquisition. The majority of households are expected to experience economic displacement (loss of agricultural land, livelihood sources, or ancillary income.

M/s Rungta Mines Limited (RML) is responsible for the overall execution of the Project. M/s Rungta Mines Limited (RML) represented by its General Manager, will have overall responsibility for policy guidance, coordination and planning, internal monitoring and overall reporting of the Project.

Table No. 31 Entitlement Matrix

Sl. No.	Section no. of RFCTLARR Act, 2013	Particulars	RFCTLARR Act, 2013 & ORFCTLARR Rules, 2016

9.5.4. Extent of Lands, Public & Private Houses, Settlements & Other Common Properties Likely to be Affected

The proposed project requires acquisition of both private and government land. The land primarily comprises agricultural holdings and fallow lands. Some common property resources (CPRs) such as access roads, village pathways, grazing areas, and water bodies may be impacted. Necessary provisions will be made to safeguard and, wherever required, restore or compensate such community assets in line with the R&R Policy and statutory requirements.

Public hearing for SIA report of land acquisition project was organized in the affected villages of Dhenkanal under the chairmanship of Additional District Magistrate (Rev), Dhenkanal in presence of affected families and raiyats. Following people were present –
Additional District Magistrate (Rev.), Sub-Collector, Dhenkanal, Additional Tahasildar (I/C), Odapada, SDPO,Dhenkanal, DSP,Dhenkanal, Joint President, M/s. Rungta Mines Limited, Dhenkanal, SDPO, Hindol, **Sub-Collector, Hindol,** Tahasildar & LAO, Hindol,
Sarpanch, Nayabhagirathipur Gram Panchayat**,** Sarpanch, Nimidha Gram Panchayat, Members of Samiti Savya, Sarpanch, Meramandali Gram Panchayat, Sarpanch, Galapada Gram Panchayat, Landowners and other villagers.
Public hearing was started by Sarda representatives Mr. Jayadev Dalai who read out the SIA report in Odia language to all the villagers, Also shared the process of Household Data collection. Thereafter all the villagers and raiyats presented their demands and opinions before the Panel officer and the Additional District Majistrate Officer(Rev.), a copy of which is enclosed.

At the end of the programme, The Additional District Magistrate sought the opinion of all the residents and land owners of respective villages who are directly and indirectly affected in the meeting whether the said project is being set up for public purpose or not. This project will lead to the development of the local area, district, state, and country. The families who lost their land will get adequate compensation as per the R & R Policy established by the new Act, taking into consideration all aspects. Therefore, the establishment of project will lead to the development of the region and the financial condition of the people will improve.

Public Hearing for the Social Impact Assessment (SIA) report of the proposed land acquisition project "Establishment of Industries For External Rail Connectivity to Plant (TOR-63-00001)" at Jhadabandha, Haladia Bahal, Kalusau Kateni, Meramandali, Nayabhagirathipur Paschimabad, Nimidha, Salapada & Uparapal under Hindol & Odapada Tahsil of Dhenkanal district was conducted in the affected villages under the chairmanship of the Additional District Magistrate (Revenue), Dhenkanal, in the presence of affected families, Landowners, and other stakeholders.

The hearing was attended by:

- Additional District Magistrate (Revenue), Dhenkanal
- Sub-Collector, Dhenkanal
- Additional Tahasildar (I/C), Odapada
- SDPO, Dhenkanal
- DSP, Dhenkanal
- Joint President, M/s Rungta Mines Limited, Dhenkanal
- SDPO, Hindol
- Sub-Collector, Hindol
- Tahasildar & LAO, Hindol
- Sarpanch, Nayabhagirathipur Gram Panchayat
- Sarpanch, Nimidha Gram Panchayat
- Members of Samiti Savya
- Sarpanch, Meramandali Gram Panchayat
- Sarpanch, Uparpal Gram Panchayat
- Sarpanch, Galapada Gram Panchayat
- Landowners and other villagers from the affected area.

The programme commenced with Mr. Jayadev Dalai, representative of SARDA, who read out the Draft SIA report in Odia language for all the stakeholders present. He also explained the methodology and process adopted for household data collection.

Following this, villagers and Landowners expressed their views, concerns, and demands before the panel members and the Additional District Magistrate (Revenue). These submissions have been documented, and a compiled copy is enclosed with this report.

At the end, the Additional District Magistrate sought the collective opinion of all directly and indirectly affected residents and landowners regarding whether the proposed project serves a public purpose. It was observed that the project is expected to contribute to the development of the local area, district, state, and the nation at large. Families losing land will be provided adequate compensation in accordance with the provisions of the Rehabilitation and Resettlement (R&R) Policy under the new Act, ensuring that all aspects are duly considered. The project's implementation is anticipated to enhance regional development and improve the socio-economic conditions of the affected population.

To,

The Rungda company, Dhenkanal

Sub: (Actual value of our land we Need.) ~~and~~

Sir,

with due Respect my self Rushav Nayak S/o Gobardhan Nayak At- salapada Po- Haladia bahal, modanga, Dhenkanal.

In salapada Rungda company taken land for four lane Railway track. here we want to say. that if the company give us the actual land price as per the others village (Kalusahu katani and Haladiabahal) and give opperunity in company (me & my family members) As per the qualification then we dont have any issue.

Therefore I request to u please solve the above issue. khata No-7, and plot No- 89 which is belongs to my late Grand father Sadyabadi Dalayar singh At- Budhapank, po-Haladiabahal, motong, Dhenkanal.

Thank you

ମୌଜା - ବାଙ୍କପାଲ । ଥାନା - ମୋରଞ୍ଜୀ । ଜିଲ୍ଲା - ମୟୂରଭଞ୍ଜ । ତାରିଖ :- 27-7-2023

ମହାଶୟ,

ସବିନୟ ନିବେଦନ ଏହି ଯେ, ମୁଁ ଉପରୋକ୍ତ ମୌଜାର ବାସିନ୍ଦା ଏବଂ ମୋର ଜମି ଉପରେ ଦୁ-ପର୍ଯ୍ୟନ୍ତ କେସ୍ ନଂ 03/2023 ଅନୁଯାୟୀ ଥାନା ମୋରଞ୍ଜୀରୁ 02.08.2023 ତାରିଖରେ ଜମି ଗ୍ରହଣ ପାଇଁ ନୋଟିସ୍ ଜାରି ହୋଇଛି । ମୁଁ ଏହା ସମ୍ପୂର୍ଣ୍ଣ ଅନିଚ୍ଛାରେ ଏହି ନୋଟିସ୍ ଗ୍ରହଣ କରୁଛି ଏବଂ ଏହା ସଂଲଗ୍ନ କରୁଛି ।

ଥାନା ଗ୍ରାମରୁ ଯାଉଥିବା ରାସ୍ତାଟି ଏକ ଅତି ପୁରାତନ ରାସ୍ତା ଯାହା ଆମ ପୂର୍ବପୁରୁଷଙ୍କ ସମୟରୁ ଚାଲି ଆସୁଛି । ଏହା ଆମ ଗାଁର ଏକମାତ୍ର ଯାତାୟାତ ପଥ ଯାହା ଦ୍ୱାରା ଆମେ ଗ୍ରାମବାସୀ ଦୈନନ୍ଦିନ ଜୀବିକା ନିର୍ବାହ କରିଥାଉ । ଏହା ଆମ ଗାଁର ଏକ ଐତିହ୍ୟ ଏବଂ ସଂସ୍କୃତିର ପ୍ରତୀକ ସ୍ୱରୂପ ଅଟେ । ଏହି ରାସ୍ତାଟି ଆମ ଗାଁର ଲୋକଙ୍କ ପାଇଁ ଅତ୍ୟନ୍ତ ଗୁରୁତ୍ୱପୂର୍ଣ୍ଣ ଅଟେ ।

ତେଣୁ ଏହି ରାସ୍ତାଟି ଯେପରି ଅକ୍ଷୁଣ୍ଣ ରହିପାରିବ ସେଥିପାଇଁ ଆପଣଙ୍କ ନିକଟରେ ମୋର ନିମ୍ନଲିଖିତ ପ୍ରସ୍ତାବ ଗୁଡ଼ିକ ବିଚାରାର୍ଥେ ଉପସ୍ଥାପନ କରୁଛି ।

(1) ପ୍ରସ୍ତାବିତ ସୁରକ୍ଷା ପରିବେଶ ।

(2) ପରୋକ୍ଷ ଗ୍ରାମରୁ ଜମିରୁ ସୂଚ୍ୟାଙ୍କିତ ଲୋକଙ୍କୁ ମୌଜାରୁ ସ୍ଥାନାନ୍ତର କରିବା ।

(3) ଶିକ୍ଷା ସ୍କାଲ୍ସିପ୍ ଓ ସ୍ୱାସ୍ଥ୍ୟ କଲ୍ୟାଣ ଯୋଜନାରେ ଆମ ଗାଁର ଛାତ୍ର/ଛାତ୍ରୀମାନଙ୍କୁ ପରିବାରର ଜଣେ ସଦସ୍ୟଙ୍କୁ ଚାକିରି ସହିତ ବାର୍ଷିକ ସର୍ଭେ ପରୀକ୍ଷା କରିବା ।

(4) ଗାଁରୁ ବାର୍ଷିକ ଅତିକମ୍ରେ ଜଣେ ଛାତ୍ରଙ୍କୁ ମେଡିକାଲ୍ ଓ ଇଞ୍ଜିନିୟରିଂ ପାଠ୍ୟକ୍ରମ ପାଇଁ 5,00,000 (ପାଞ୍ଚ ଲକ୍ଷ) ଟଙ୍କା ଦେବା ।

(5) ଜମି ଅଧିଗ୍ରହଣ ସମୟରେ ଆମ ଗାଁର ଜଣେ ଯୁବକଙ୍କୁ ଚାକିରି ଦେବା ।

ଏହି ପ୍ରସ୍ତାବଗୁଡ଼ିକ ଉପରେ ଆପଣଙ୍କ ଦୟାଦୃଷ୍ଟି ଆବଶ୍ୟକ । ଆପଣଙ୍କ ଦୟାଦୃଷ୍ଟି ଆମ ଗାଁର ଲୋକଙ୍କ ପାଇଁ ଆଶୀର୍ବାଦ ସ୍ୱରୂପ ହେବ ।

ଧନ୍ୟବାଦ ସହିତ,

ଆପଣଙ୍କ ବିଶ୍ୱସ୍ତ
